📁 [Portfolio](#)

Profile Summary

- Data Analyst with strong expertise in data collection, data cleaning, data transformation, data visualization, and ETL processes using SQL, Python, Power BI, Tableau, and Excel.
- Adept in data modeling, data governance, and machine learning optimization, with a proven track record of improving operational efficiency and delivering actionable insights.
- Experienced in developing interactive dashboards, automating reporting processes, and leveraging data-driven decision-making to drive business growth.

Relevant Coursework

- | | | | |
|----------------------|---------------------|-----------------|----------------------------|
| • Data Integrity | • Data Governance | • Generative AI | • Requirement Gathering |
| • Data Visualization | • Data Manipulation | • Data Mining | • Business Impact Analysis |
| • ETL Processes | • Cloud Computing | • Data Modeling | • Process Optimization |

Experience

Uptoskill - Data Analyst (Intern)

Jan 2025 – Present

- Led a team of 6 to clean, transform, and analyze large datasets using Python, SQL, and Excel, improving data accuracy by 35% and enabling actionable business insights through effective data mining.
- Developed and automated interactive dashboards using Power BI and Tableau, streamlining reporting processes and reducing manual effort by 30%, accelerating decision-making.

TechSakshama - AI & Data Analysis (Intern)

Nov 2024 – Dec 2024

- Developed a Face Recognition Attendance System using Python, OpenCV, and machine learning, improving accuracy by 95% and reducing human errors.
- Hands-on experience with AI and Machine Learning: Worked on data manipulation, feature extraction, and image processing using OpenCV, contributing to the AI: Transformative Learning program by Microsoft & SAP.

Projects

Real-Time Sales Analytics Dashboard | SQL, Power Bi | [Live Dashboard](#)

Jan 2025

- Developed and optimized an interactive Sales Dashboard using Power BI and SQL, increasing data accessibility by 40% and reducing report generation time by 30%. Implemented end-to-end ETL processes, ensuring accurate sales data integration from 3+ sources, improving reporting accuracy by 25% and enabling faster decision-making.

Weather Data Analysis | SQL, Python, Pandas, Numpy | [GitHub Repository](#)

Nov 2024

- Analyzed weather data with Python (Pandas, NumPy), improving forecasting accuracy by 10% and reducing analysis time by 15% through statistical techniques and data transformation to enhance model precision.

Bank Management System using Java | Java, SQL, | [GitHub Repository](#)

Sep 2024

- Developed a secure, Java-based banking system with account management, transaction processing, and balance tracking, incorporating SQL for local data storage, optimizing performance, and reducing transaction processing time by 20%, while ensuring data privacy through robust user authentication.

Technical Skills

Analytical Tools: Excel, Power BI, Power Query, Tableau

Languages: Python, Java, R Programming, SQL, MySQL, HTML

Technologies/Frameworks: GitHub, AWS, Linux, DBMS, WordPress, CSS, Pandas, NumPy

Education

Alva's Degree College

Bachelor of Computer Application – CGPA: 8.45

Aug 2022 – July 2025

Moodbidire, Karnataka

Extracurricular / Certifications

- Career Essentials in Data Analysis by Microsoft and LinkedIn – [View Credentials](#)
- Google Data Analytics Professional, Coursera – [View Credentials](#)
- Data Analytics and Visualization Virtual Experience – [View Credentials](#)
- Tcs ion young professional, TCS iON – [View Credentials](#)
- Python for Data science, Conginitive class – [View Credentials](#)
- Professional DevOps, Infosys Spring Board – [View Credentials](#)
